

How to Download the NMHikes Mobile App

Instructions for iPhone:

1. On your iPhone, download Apple's free '**Test Flight**' app from the *App Store*
2. After the admin adds you to Apple's Test Flight Users list, you will receive an invitation to join. Typically this will happen within 24 hours, but may take longer if the admin is temporarily unavailable. **NOTE:** You must have provided your Apple ID email when you requested the app: the invitation will appear in that inbox.
3. You must respond to the email invitation on your desktop/laptop, and NOT on your iPhone! Responding using your iPhone will disrupt the process (this is an Apple bug).
4. After you respond, the admin will then add you to Apple's Test Flight Distribution list – again, this will normally happen within 24 hours.
5. After you have been added, the admin will distribute the app via **Test Flight**, and you will receive an email announcing that the app can now be downloaded.
6. Open **Test Flight** and click to download the app.

Future upgrade notifications:

1. After the initial install, any future upgrades to the app are automatically distributed to the Test Flight app.
2. You simply receive the announcement, open **Test Flight**, and click to download

NOTE:

For security and compliance purposes, all iPhone apps go through a rigorous vetting process before Apple will allow distribution. The **Test Flight** process insures the integrity and security of the app.
